Detailed Action

1. A restriction is required under 35 U.S.C. 121 between one of the following groups:

I. Claims 1, 3 and 5, drawn to a method of treating an iron overload disease comprising administering an HFE polypeptide, having an amino acid sequence of SEQ ID NO:1, 2 or 3, classified in class 424, subclass 185.1, or

II. Claims 2, 4 and 6, drawn to a composition comprising an HFE polypeptide having an amino acid sequence of SEQ ID NO:1, 2 or 3, classified in class 514, subclass 12.

The inventions are distinct, each from the other because:

2. Groups II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. 806.05(h)). In the present case, the product as claimed, the composition comprising an HFE polypeptide, can be used in a method of affinity purification as well as in a method of treating an iron overload disease.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
